

CHEMISTRY FOR GOOD CHALLENGE

KEY STEPS

1 RESEARCH

- Read, watch and listen to learn more about the waste issue
- Think about the problems with rubbish in your area

2 CHAT

- Meet up with your team to share what you found out
- Talk about your ideas
- Pick one problem you are going to solve

3 INVESTIGATE

- Delve deeper into the research you did
- Start designing your solution
- Look at materials, costs and the chemistry

4 TEST

- Try out your idea
- See if it works and record what you observe
- Could anything be improved?

5 CREATE

- Come up with your final idea
- Make your final idea and bring it to life
