AWARDS
& ALUMNI**

CHEMISTRY CHANGEMAKERS

Competition for 16 - 17 yrs

POSTER COMPETITION

The Salters' Institute believes that chemistry can change our world for the better.

Chemistry can create ways to reduce air pollution, provide sustainable energy, increase food security, and combat many health issues. You have a role to play in the future of chemistry and positive social change.

New ideas are important in solving some of the big challenges we face. We are looking to you to find creative solutions using chemistry to tackle societal issues.

Enter by Friday, 5 January 2024 for a chance to win £300 for you, and £300 for your science department!

NEXT STEP

Choose a societal issue within your community that you wish to tackle from the themes below:

- Travel and Transport
- Homes and Habitats
- Health and Lifestyle

Then design an A3 poster explaining the issue, and creating a chemistry related solution.

Further guidance can also be found on our website:
